

I receive 3 to 5 pages of junk faxes just about every day. Some Faxes include removal instructions. Usually a phone number to call. I've called dozens of times asking to be removed from these lists, but the junk keeps coming.

One especially annoying junk fax is titled "Penny Stock Watch". This seems to be sent by someone who is trying pump up a stock. However, since they are not actually selling anything directly there is no contact number or even fax number given to contact them to ask them to stop.

I've never purchased penny stocks, nor did I ever request this newsletter, but I cannot figure out how to make them stop sending it.

I've tried using \*69 to find the phone number of who is sending the fax, but the service is never available on the calls that come in with this type of FAX.

I'm at a loss to figure out how to make it stop.
